

# Handling Data

There are different ways to display data and information. You need to be aware of the different types of graphs and tables and be able to interpret their information.

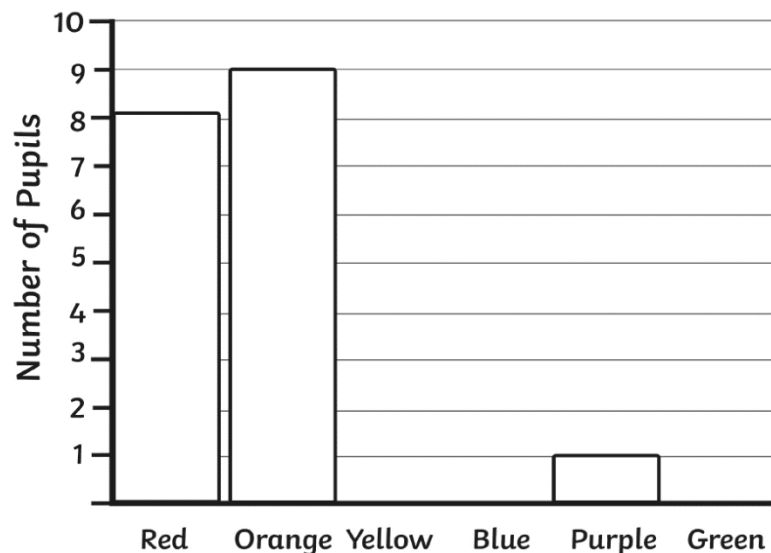

## Tally Charts

Tally marks are grouped in **fives** which make it easier to count.

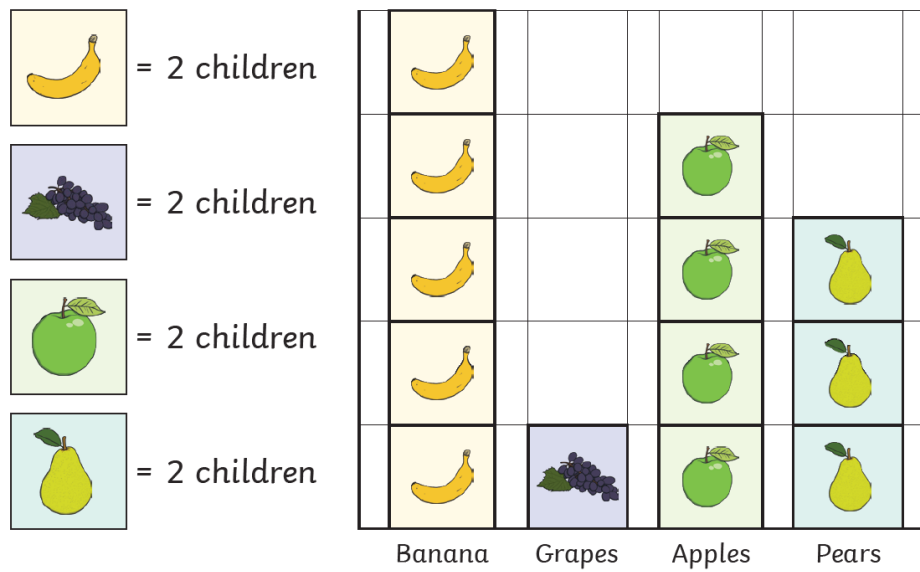

Colour	Red	<del>    </del>	8
	Orange	<del>    </del>	9
	Yellow		5
	Blue		2
	Purple		1
	Green		7

## Bar Charts

These are used to present information in bars to show things at a glance.

## Pictograms

### Sample Questions Based on the above Pictogram

1. How many children liked grapes?
2. What was the most popular fruit?
3. How many children voted in total?
4. What is the difference between the number of children who liked pears and the number of children who liked bananas?
5. Which would you have voted for?
6. Add your vote in. What is the new total for that item?

## Carroll Diagram

This is another way to record information.

	Boy	<del>Boy</del>
Brown Hair		
<del>Brown Hair</del>
